

AMERICORE RESOURCES TO COMMENCE DRILLING THIS WEEK AT TRINITY SILVER PROJECT, NEVADA

Vancouver, British Columbia--(Newsfile Corp. - October 28, 2026) - Americore Resources Corp. (TSXV: AMCO) (OTCQB: AMCOF) (FSE: 5GP) ("Americore" or the "Company") is pleased to announce that drilling will commence this week at its Trinity Silver Project in Pershing County, Nevada. The program marks the transition from geological modelling and drill planning to active drilling at the past-producing silver project.

Trinity has a previously reported historical estimate of approximately 36 million silver-equivalent ounces ("AgEq"), as disclosed in the Company's December 4, 2025, news release. This historical estimate provides context for the scale of the mineralized system as Americore undertakes new drilling and continues its technical evaluation of the project.

Drilling is designed to generate new geological and assay data to refine the Company's understanding of the silver mineralization and guide future work.

"Starting drilling this week is an important milestone for Americore and our shareholders," said Justin Hanka, Chief Executive Officer. "We are putting our geological work and planning into action at Trinity. Our focus now is on running a well-managed program, generating new results and using that information to guide the project's next stage of exploration."

Moving Trinity Forward

The program brings together Americore's geological interpretation, modelling and field planning, moving that work into active exploration on the ground.

Information collected during drilling will be assessed alongside the existing project database to refine the geological model, inform ongoing resource evaluation and help prioritize subsequent exploration.

The Company intends to provide updates as drilling progresses and release assay results following receipt and technical review.

Historical Estimate

The approximately 36 million ounces AgEq figure comes from SRK Consulting (U.S.) Inc.'s report for Liberty Silver Corp., effective December 20, 2012, titled "Updated Technical Report on Resources, Trinity Silver Project, Pershing County, Nevada." It represents a historical inferred estimate incorporating silver, lead and zinc values.
